	4.	5.	The small block of barracks buildings at the main gate of the installation allogedly quartered a cadre unit which continuously detached noncommissioned officers of various branches of service who partly left in the direction of Berlin and partly in the direction of Stralsund.				
	-	6.	The barracks installation is to be occupied much more heavily in the coming winter. In late October, about 10 trucks each towing a light AT gun arrived. One of these trucks was also loaded with an AT gun. Engineers were also expected to arrive at the installation. An engineer vehicle loaded with three small pontoons was seen for the first time on 20 October 1952.				
		7.	In the area adjoining to the barracks installation in the direction of the drill grounds, 15 four-family houses and another 15 standardized houses were under construction. Five single-story temperary buildings were under construction near the Ruhleben hospital which was taken over by the VP.
